

## RDX Announces Hadoop Service Offering

Written by Australian Business

---

( [PRLEAP.COM](http://PRLEAP.COM) ) PITTSBURGH – January 8, 2014 – RDX, the pioneer of remote database administration services, is proud to announce that it has added Apache Hadoop to its service offerings. As the amount of stored, processed, and replicated digital data continues to grow, more organizations are looking for ways to better utilize their large data stores. With RDX's Hadoop service offering, customers can easily scale large amounts of data cost effectively and with the support of certified Big Data Experts.

Apache Hadoop has become an industry leading software for managing Big Data. The software delivers a dependable and highly available framework for faster and more efficient processing of large data stores. Additionally, the software's flexible operating model allows organizations to easily scale their data to meet growing business needs. From examining clients' current environments to installing and deploying their servers, RDX's certified Big Data Experts will make the intimidating task of implementing a Hadoop solution trouble-free.

RDX's team of 100% onshore Big Data Experts can also help clients manage their existing Hadoop environments for a fraction of the cost of an in-house resource. RDX's team of professionals will be their clients' technology partners and will help each organization utilize the data within their Hadoop environments securely and effectively. For more information about RDX's Hadoop service offering, please visit its [Hadoop Solutions](#) page.

### About RDX [Remote DBA Experts]

RDX provides 100% US-based, 24X7 support for Oracle, SQL Server, DB2, RDB and MYSQL databases as well as operating system support for all major UNIX and Linux offerings. Since its inception in 1994, RDX has helped hundreds of companies lower support costs while increasing performance and availability.

RDX's highest priority is to safeguard its customers' sensitive data stores, and its expert staff of highly-trained professionals is backed by a monitoring and support infrastructure that has been continuously improved and enhanced throughout its 20 year history. Recently, RDX achieved its second SSAE 16 Type II with zero audit exceptions and received its final PCI Attestation documentation in October of 2013.
