

## Systems Technologies' Vision Link Premiere is Now UL1069 Edition 7 Certified

Written by Australian Business

---

( [PRLEAP.COM](http://PRLEAP.COM) ) Hayden, Idaho – [Systems Technologies](http://SystemsTechnologies.com) , a leading provider of wireless nurse call systems, today announced that its signature Vision Link Wireless Nurse Call system, has been successfully tested and certified in the UL 1069 Edition 7 Standard for Hospital Signaling and Nurse Call Equipment. The listing means that Vision Link may now be installed in all care levels, including skilled and acute.

With over 20 years of industry leading wireless nurse call systems product development, Systems Technologies is the first to ever obtain a UL1069 listing for hospital signaling and nurse call equipment. These wireless nurse call and emergency call systems have been trusted and installed in all 50 states and several foreign countries in over 2,500 senior living communities.

VisionLink Premier offers eight types of alarm notification including pager, cell phone, wireless phone, email, two-way radio, central station and more. Additionally, staff may opt for connective hardware and software that enables remote monitoring and electronic charting from devices like iPads and netbooks. This makes Vision Link ideal in care facilities that offer independent living as well as assisted living and acute or skilled care.

With highly customizable integrative options, the Vision Link system is one of the easiest, most reliable and cost-effective options for facilities of all sizes and levels of care. In addition to its premier systems, Systems Technologies offers a variety of professional call system and related products. They have become known in their industry for high quality emergency call systems and the processes that make the most of them in the care and emergency call industries.
