

SMBs Benefit from Outsourcing IT to SACA Technologies

Written by Australian Business

(PRLEAP.COM) Anaheim Hills, Calif. – January 30, 2014– Businesses that have made it a goal to make technology a main priority in 2014 should choose to outsource their IT management to SACA Technologies. By choosing outsourced IT, Los Angeles and Southern California area businesses can get the most out of their IT resources while still managing to reduce their IT costs.

"At SACA Technologies, we know that technology has the ability to enable business growth and streamline business processes and practices," SACA Technologies CEO Alexander Saca said. "But maintaining and managing technology can be a daunting task for many small and medium size businesses, who may not have the resources to hire a full-time staff member devoted to their IT needs.. All of our services are designed to eliminate the stress of IT maintenance so business owners and their employees can focus on running the business."

SACA Technologies offers a wide range of Professional Services (individual services designed for businesses that wish to improve specific aspects of their IT infrastructure), as well as a comprehensive suite of solutions known as managed IT services. Here is how these services help businesses looking to outsource their IT:

IT Service & Support. Even if a business has employees with technical knowledge, there are a lot of IT issues that require more skills and knowledge than the average person possesses. The technicians at SACA Technologies can resolve any IT problem quickly and efficiently.

IT Security.

The security solutions offered by SACA Technologies protect SMBs from outside threats and protect private data. With solutions such as network monitoring, access controls, and antivirus software, businesses can rest assured that their infrastructure is protected, without having to install and perform security tasks on their own.

Sales & Procurement.

Thanks to their relationships with software developers and hardware manufacturers, SACA Technologies can acquire and install products quicker and at a lower price than most businesses would be able to on their own.

Managed IT Services.

SACA Technologies' Managed IT Services is an all-inclusive, proactive approach to IT management. The solution is designed to function like an in-house IT department, but is available around-the-clock and at a much lower price than a \$50,000/year staff member. Monitoring, disaster recovery, IT security, automation, fixes & repairs and alerts & reporting are all included. To learn more about outsourcing your IT management to SACA Technologies, call a sales representative today at (888)603-9030.

About SACA Technologies
