) Netrepid, a provider of infrastructure hosting services that work side by side with growing companies to accelerate their technology evolution from the ground to the cloud, today announced it has been named to CRN's Managed Service Provider (MSP) 500 list as one of the MSP Hosting Service Provider 100. The annual list recognizes the top technology providers and consultants in North America whose cutting-edge approach to managed services puts end-user customers in the best position to improve efficiencies, cut costs and speed time to market for their own products and services.

In today's world of computing power, end users are barraged by options. CRN, the leading media outlet for vendors and solution providers attempting to understand sales and service channels, selected the top MSPs in order to bring clarity to the decision-making process.

This year, CRN's MSP500 is broken down into three groups highlighting the MSP Elite 150, who are large data center-focused solution providers with a strong mix of on-premise professional services as well as off-premise services; the MSP Pioneer 250, who have a business model heavily weighted toward managed services focused on the small- and midsize-business market; and the MSP Hosting Service Provider 100, who own and operate their own data centers, providing a wide array of subscription-based outsourced services.

Netrepid has become one of North America's leading providers of outsourced services thanks to its 8000-square foot, Tier 3-quality, HIPAA and PCI-compliant data center located in Harrisburg, PA. The company acquired the data center in 2009 when it acquired PA Online, an internet service provider originally founded in 1993. Following substantial investment and improvements in the data center infrastructure, Netrepid is now able to provide its direct clients and network of partner-resellers a wide array of subscription-based services ranging from Hosted Exchange, SharePoint, and desktops to server colocation and virtualization.

Netrepid Named to CRN's Managed Service Provider 500 List

"The managed services landscape continues to evolve rapidly as organizations are discovering they can impact both bottom-line and top-line growth," said Robert Faletra, CEO, The Channel Company. "When it comes to strong managed services and off-premise solutions, these companies are the industry's proven leaders, showing just how they can change the game for their customers and we congratulate them on their success."

"Advancement in our data center solutions has been - and will continue to be - a critical component to the continued success of our company," said Sam Coyl, President/CEO, Netrepid. "Being recognized by a leading organization like CRN as one of North America's top MSP hosting service providers is a game changer for us, and we greatly appreciate the designation."

Coverage of the MSP500 will be featured in the February/March issue of CRN, and online at www.CRN.com

About Netrepid Netrepid provides infrastructure hosting services that work side by side with growing companies to accelerate their technology evolution from the ground to the cloud. Since being founded in 2004, Netrepid has also positioned itself as a key partner to many other technology services and solutions providers. Rather than becoming a vendor or a partner, Netrepid creates a relationship that allows them to become part of their clients' team. This strong relationship based culture enables Netrepid to provide quality advice, support, and direction to their clients as they match technology to their business.
