

RDX Announces Headquarters Relocation

Written by Australian Business

(PRLEAP.COM) PITTSBURGH – March 13, 2014 – RDX, the pioneer of remote database administration services, is pleased to announce that the company is moving to nearly 27,000 square feet of new office space at 2000 Ericsson Drive in Keystone Summit, one of Pittsburgh's most esteemed office parks. Secured to accommodate the company's rapid growth, the new space will unite RDX's downtown and Wexford offices in what originally housed the Heinz Innovation Center. While no official move-in date has been set, the majority of RDX's staff will relocate in April.

With both offices under one roof, RDX will be positioned to grow even stronger. "RDX has experienced rapid growth over the last few years. Now we are able to bring the whole team together and bring a cohesive team strategy to our clients by combining the technical talent of our Global Delivery Unit and our Sales and Marketing Team that continues to gain global market share in the remote infrastructure space," said Rob Brown, RDX's Vice President of Sales and Marketing. Additionally, the space itself will be optimized to include soundproofed HVAC and power systems and 180-degree workstations. Improvements also include an expanded kitchen area, ergonomic chairs, upgraded vending machines, and a game room. With upgraded working conditions and equipment, RDX will be able to provide even better service to its customers and a more pleasurable working environment to employees.

RDX will be sharing a campus with well-known Pittsburgh institutions such as H.J. Heinz, Federated Investors, Westinghouse Electricity, and Vector Security. Keystone Summit also features a plethora of amenities including free parking, an onsite exercise facility, a cafeteria, and easy access to jogging trails. About RDX [Remote DBA Experts]

RDX provides 100% US-based, 24X7 support for Oracle, Oracle EBS SQL Server, DB2, RDB and MYSQL databases as well as operating system support for all major UNIX and Linux offerings. Since its inception in 1994, RDX has helped hundreds of companies lower support costs while increasing performance and availability.

RDX's highest priority is to safeguard its customers' sensitive data stores, and its expert staff of highly-trained professionals is backed by a monitoring and support infrastructure that has been continuously improved and enhanced throughout its 20 year history. Recently, RDX achieved its third SSAE 16 Type II with zero audit exceptions and received its final PCI Attestation documentation in October of 2013.
