[Time Doctor is a Leading Time Tracking and Productivity Management Software](#) (PRLEAP.COM) (April 20, 2014)

Project Managers now have an exciting new tool to accurately track time spent on resolving issues:

[Time Doctor](#)

, a leading

[time tracking software](#)

, is proud to announce that it has successfully integrated its key time tracking features into JIRA, a highly effective

[project and issue tracking software](#)

that helps resolve bugs and enable smooth project management.

With this new integration, Jira users will now be able to use Time Doctor's detailed reporting system to track daily, weekly, and monthly units of time spent on resolving issues of any project. It can even be utilized for [tracking billing hours](#) spent on resolving an issue.

Rob Rawson CEO and co-founder of TimeDoctor.com is an avid user of Jira. Says Rob, "I recently visited the offices of Atlassian (Jira) where they have a whole floor of amazing developers. Jira is a fantastic issue tracking tool, we use it every day. Adding our integration will help developer teams out there who love Jira and want to be even more productive when using it."

Project Managers who want to dramatically [improve productivity](#) as well as have a useful tool to track time for billing purposes are invited to review these latest integrations and see how much more effectively issues can be resolved.

About: Time Doctor is a time tracking and management software that helps companies effectively manage their projects and dramatically improve productivity and profits. Time Doctor helps businesses streamline their project management by analyzing where time is spent. Companies with remote workers can now manage them just as if they were in the same office.
