(PRLEAP.COM) April 30, 2014 - WebSan Solutions Inc. is proud to announce the launch of a new U.S. office, allowing the company to increase its capabilities in key areas that align with current and future growth plans.

The new office will enable a significant expansion of WebSan's team to support the growth the Canadian company is experiencing, while continuing to maintain core hosting activities in a secure SAS 70/ SSAE16 certified data centre in Toronto, Canada.

Over the past fiscal year, WebSan has acquired an astonishing number of new clients and experienced record growth in the company's history.

"Our team is excited about expanding our activities across the border," said Andrew King, Managing Director of WebSan Solutions Inc. "This move represents not only our own progression as a company but our commitment to strengthening the success we've built for our customers."

WebSan Solutions is not only one of the largest [Cloud Hosting providers of Dynamics GP](#) in Canada but has clients all over North America in all time zones. "We are pleased to be building our physical presence in the U.S. so we can better serve our customers".
