

Time Doctor Brings Accurate Time Tracking to Teamwork PM Users

Written by Australian Business

[Time Doctor is a powerful time tracking and productivity software.](#)
([PRLEAP.COM](#)) (June 6, 2014) Time

Doctor, a leading
[time tracking software](#)

based in Sydney, Australia, announces Time Doctor's newest feature – Teamwork PM Integration. Teamwork PM is a

[project manager platform](#)

with powerful features like task management, milestone tracking and Gantt charts that ensure tasks and projects meet deadline schedules.

Time Doctor is a time tracking and [productivity monitoring software](#) that keeps workers on track. Task completion is monitored by way of keystrokes, screenshots, websites, and computer applications, to ensure that workers are not distracted, and even automatically pops out reminders if they do veer off track.

As an [online management tool](#) , Teamwork Project Manager coordinates the efforts between team members and their clients to ensure that projects are accomplished in a cohesive and organized manner. It features a dashboard function giving users a quick over-view of all the projects, and allows them to stay up to date with recent activity as well as handy quick reference tabs to access the last five projects worked on. The visual function utilizing Gantt charts allows users to easily see how the project is panning out.

Combining these and its other useful features with the powerful tool of Time Doctor allows project managers and their teams to accomplish their goals with efficient and seamless coordination. [Achieving productivity targets](#) and realizing your company's vision and can be realized in faster time than ever with the integration of these two extraordinary [project management tools](#)

About: Time Doctor is a time tracking and management software that helps companies effectively manage their projects and dramatically improve productivity and profits. Time Doctor helps businesses streamline their project management by analyzing where time is spent.
