Additionally, these services will be turn out to be a boon for the companies who have long craved for an email template design customization solution in deadline oriented environment with squeezed budgets.

### Template customization service to rescue your brand guidelines!

Companies who used to buy the low cost templates usually had to undergo the pain of poor code quality, restricted customization, increased design and coding cost. Also, some of the companies who are engaged in frequent email marketing weren't able to execute it in time because of lack on technical and design capabilities in house and buying a template as well didn't yield expected results.

Monks decide to fight out the challenge providing their customers and prospects with a complete suite of template customization service. Once client [chooses the template out of 100+ ready to use mobile optimized email and newsletter designs](#), Monks roll up their sleeves and start to mollify or tailor the template, add the content, colours, fonts, images, links and other brand elements as required by the clients, radically make the template look tailor made and deliver blast ready templates back within 8 hours. Solution remains completely hassle free as entire customization takes place at the monastery.

### So, how will the new service benefit email marketers?

With the template customization service for 100+ ready to use mobile optimized email and newsletter template designs, customer will be able to:

Relax and watch monks work at the abbey customizing said email templates of clients, add Content, Images, Colours, Fonts, Links and other branding elements as per the clients guidelines, Reduce their email template design and coding expenses, Get ready to use template designs in addition to the template customization service, in as less as \$65, Enjoy the 8 hours turnaround delivery time, least in the industry, Get a litmus test report enabling email template compatibility with 40+ email clients, Save a lot of time on developing a design and utilize it more strategically elsewhere and, Enhance the visual impact of their external branding. An abbot at the monastery mentions "Conceive of a scenario, where the client wants to send out an email and decides to do so just before 8 hours. Especially, when they do not have in-house design capabilities, have insufficient knowledge of design software and lack email client supportability or do not understand HTML coding language well, it becomes
